## WORK EXPERIENCE

---

### Self-Learning

Full Stack Developer

- Built a **CRUD application** using Full Stack Developer to manage user data.
- Developed a **To-Do App** with **React.js** and **Node.js**, allowing users to add, update, and delete tasks.
- Fetched and displayed data from the **Pokémon API** using React and Axios.
- Integrated a **dummy API** to practice API calls, data handling, and UI rendering.

## EDUCATION

---

### L J Institute of Computer Application

Master Of Computer Application - 6

July 2023

- Developing expertise in **software engineering, data structures, algorithms, and database management**.
- Gaining hands-on experience in **application development, system design, and problem-solving**.
- Working on **real-world projects** to enhance programming skills and build scalable applications.
- Exploring modern technologies to stay updated with industry trends.

### Gujarat University

B.Com - 6.8

July 2020 - April 2023

- Built a strong foundation in **business management, finance, accounting, and economics**.
- Developed **analytical thinking and problem-solving** skills applicable to both business and technology.
- Gained knowledge of **business operations, taxation, and financial decision-making**.
- Explored the role of **technology in business** and its impact on modern enterprises.

## PROJECTS

---

### Online Food Delivery System (College Project)

Sept 2024

- Developed an **Online Food Delivery System** as a college project to streamline food ordering within the campus.
- Designed a user-friendly interface for **browsing menus, placing orders, and tracking deliveries**.
- Implemented **CRUD operations** for managing food items, orders, and user profiles.
- Worked with **APIs** to fetch and display real-time order updates.
- Focused on **software engineering principles** to ensure efficiency and scalability.

## SKILLS

---

JavaScript, HTML, CSS, Node.js, RESTful APIs, Git, GitHub, Postman,
